

Product overview

For a better life

Bosch Sensortec
sensing solutions

BOSCH

Invented for life

Bosch Sensortec – At the core of your everyday life

Bosch Sensortec offers a broad portfolio of microelectromechanical systems (MEMS) based sensors and solutions that enable consumer electronic devices to sense the world around them. The product portfolio includes motion sensors such as 3-axis accelerometers, gyroscopes, magnetometers and integrated 6- and 9-axis sensors, smart sensor systems as well as environmental sensors for measuring barometric pressure, temperature, humidity and gases.

Motion sensors

Our portfolio of motion sensors includes products for motion, orientation and gesture detection. Motion sensors are designed for several consumer electronics and IoT applications in the field of smartphones, wearables, smart home, drones, toys, virtual and augmented reality, gaming, as well as industrial applications.

Smart sensor systems

Our portfolio of smart sensor systems is specifically designed for always-on sensor applications in smartphones, wearables and tracking devices. It offers you flexible, low-power solutions for motion sensing and sensor data processing.

Environmental sensors

Our portfolio of environmental sensors includes barometric pressure sensors, as well as integrated environmental sensors. These integrated environmental sensors combine barometric pressure, relative humidity, gas and ambient temperature sensing functions. Environmental sensors are ideally suited for indoor air quality measurement, sport & fitness monitoring, weather forecast, home automation control, Internet of Things, GPS-enhancement and indoor navigation.

Accelerometers

The BMAs are advanced, ultra-small, triaxial, low-g acceleration sensors with digital interfaces (SPI, I²C, interrupt pins) targeted for low-power applications. Featuring different digital resolutions (12-16 bit), the BMA family allows for very low noise measurement of accelerations (range programmable from 2...16 g) in three perpendicular axes and thus senses tilt, motion, shock and vibration in smartphones, man machine interfaces, wearables, smart home, as well as industrial applications.

The BMA family has 1 kB FIFO and integrates embedded intelligence which enables precise low current step counting and a multitude of other always-on features. BMA456 fits into wearable or hearable devices - depending on the feature set. BMA490L is specifically designed for the long lifecycle of industrial applications.

Product	Package	Description	Key performance parameters	Current consumption	Noise	Offset	TCO
BMA456	LGA 2.0x2.0x 0.65 mm ³	High performance accelerometer with integrated features for hearable and wearable applications and reduced height	<ul style="list-style-type: none">• Low noise, low offset and low TCO• 16 Bit• Application specific feature sets can be programmed (hearables feature set, wearables feature set)	High performance: 150 µA Normal mode: 14 µA at 50 Hz	120 µg/√Hz	20 mg	±0.35 mg/K
BMA400	LGA 2.0x2.0x0.95 mm ³	Ultra-low power accelerometer with integrated features for Internet of Things (IoT), smart home, wearables and hearables	<ul style="list-style-type: none">• Self wake-up/sleep (sleep mode: 160 nA)• No duty-cycling and max. performance at lowest current consumption• Programmable interrupts (generic interrupts)• Low current step counter and tap feature	High performance: 14.5 µA Low power: 0.85 µA	X,Y: 180 µg/√Hz Z: 240 µg/√Hz	50 mg	±1 mg/K

Note: The **specs in bold** highlight improved feature(s) of the specific product compared to other products within the same product family.

Absolute orientation sensors

The BMX is a small, 9-axis sensor, consisting of a triaxial accelerometer, a triaxial gyroscope and a triaxial magnetometer. The BMX allows accurate measurement of angular rate and magnetic fields in three perpendicular axes within one device. With its ultra-small footprint, the BMX is unique in the class of low noise 9-axis measurement units. The BMX is designed for motion detection applications, such as device orientation measurement, gaming, human machine interfaces, wearables, AR/VR and robots.

Product	Package	Description	Key performance parameters	Current consumption	Noise	Offset	TCO
BMX160	LGA 2.5x3.0x0.95 mm ³	<ul style="list-style-type: none">Features CE industry's smallest foot-print for 9-DoF (accelerometer/gyroscope/magnetometer combo) sensorsOptimized for space constrained applications e.g. wearables	<ul style="list-style-type: none">Low power consumptionLow noise, low TCS gyroscopeLow noise accelerometer16 bit	Full operation Accel: 180 μ A Gyro: 850 μA Mag: 660 μ A	(A): 180 μ g/ $\sqrt{\text{Hz}}$ (G): 0.007 dps/$\sqrt{\text{Hz}}$	(A): $\pm 0.03\%$ /K (G): $\pm 0.02\%$ /K	(A): ± 1 mg/K (G): $\pm 0.05^\circ$ /s/K

Magnetometer

The BMM150 is a low power and low noise 3-axis digital magnetometer to be used in compass applications, which include virtual reality, gaming and navigation on devices such as smartphones, tablets and robots requiring magnetic heading information.

Product	Package	Description	Key performance parameters	Current consumption	Noise	Offset	TCO
BMM150	WLCSP 1.56x1.56x0.6 mm ³ 0.4 mm diagonal ball pitch	3-axis magnetometer for eCompass applications	<ul style="list-style-type: none">Robust against external magnetic shocks (e.g. >100 mT)Low and predictable temperature dependencyConfigurable noise and current consumption and ODR	Low power preset: 170 μ A Normal mode: 500 μ A	500 nT (RMS noise)	± 2 μ T (software calibrated)	Software compensated

Note: The **specs in bold** highlight improved feature(s) of the specific product compared to other products within the same product family.

Inertial Measurement Units

Bosch Sensortec optimizes its IMUs (Inertial Measurement Units) for advanced smartphones, wearables, AR and VR, drones, gaming and robots applications. They are designed to provide maximum flexibility to customers. An IMU combines a gyroscope with an accelerometer in one system-in-package (SiP). It enables for examples real-time motion detection, indoor navigation, gesture and activity recognition as well as optical image stabilization (OIS).

Product	Package	Description	Key performance parameters	Current consumption	Noise	Offset	TCO
BMI270	LGA 2.5x3.0x0.8 mm³	<ul style="list-style-type: none"> Newest member of Bosch's next-generation IMUs Very low power, smart features Optimized for e.g. hearable and wearable applications 	<ul style="list-style-type: none"> Motionless Component Retrimming (CRT) for gyroscope calibration High-performance accelerometer (low offset, TCO, TCS) Features: context & activity / gesture recognition 	Full operation: 685 µA	(A): 160 µg/√Hz (G): 0.007 dps/√Hz	(A): ±20 mg (G): ± 0.5 °/s	(A): ±0.25 mg/K (G): ± 0.015 °/s/K
BMI088	LGA 3.0x4.5x0.95 mm ³	<ul style="list-style-type: none"> High-performance IMU featuring vibration robustness Optimized for drones and robots 	<ul style="list-style-type: none"> High-g accelerometer (up to ±24 g) Low sensitivity errors (over lifetime) Extremely low gyro bias instability (< 2°/h) 	Full operation: 5.15 mA	(A): 190 µg/√Hz (z) / 160 µg/√Hz (x,y) (G): 0.014 dps/√Hz	(A): ± 20 mg (G): ± 1°/s	(A): ± 0.2 mg/K (G): ± 0.015 °/s/K
BMI085	LGA 3.0x4.5x0.95 mm ³	<ul style="list-style-type: none"> High-performance IMU featuring automotive proven gyroscope and low noise accelerometer Optimized for augmented/virtual reality applications 	<ul style="list-style-type: none"> High stability and low latency Low drift gyroscope Outstanding temperature stability Extremely low gyro bias instability (< 2°/h) 	Full operation: 5.15 mA	(A): 135 µg/√Hz (z) / 105 µg/√Hz (x,y) (G): 0.014 dps/√Hz	(A): ± 20 mg (G): ± 1°/s	(A): ± 0.2 mg/K (G): ± 0.015 °/s/K

Note: The **specs in bold** highlight improved feature(s) of the specific product compared to other products within the same product family.

Sensor node

The BNO055 is a smart sensor implementing an intelligent 9-axis absolute orientation sensor, which includes sensors and sensor fusion in a single package. This smart sensor is significantly smaller than comparable solutions.

Product	Package	Description	Key performance parameters	Integrated MCU	Embedded software*	Interfaces	Current consumption
BNO055	3.8x5.2x1.13 mm ³	Smart sensor system with integrated 9-axis (accelerometer, gyroscope, magnetometer) MEMS sensor, and MCU with sensor fusion software in a single package	<ul style="list-style-type: none">• High bias stability gyroscope• Integrated sensor fusion software	32 bit cortex M0+ microcontroller	BSX 3.0 full fusion	I ² C, UART, HID-I ² C	Suspend mode: 40 µA 9DOF at 100 Hz ODR: 12.3 mA

Programmable sensor systems

Meet our programmable sensor systems, which include a customer programmable microcontroller. This allows an even more versatile sensor application such as 3D orientation, step counting or activity recognition in smartphones, wearables and other mobile devices.

Product	Package	Description	Key performance parameters
BHI260AB	4.1x3.6x0.83 mm ³	Programmable low-power smart sensor system with an integrated 6-axis IMU (accelerometer, gyroscope) plus a MCU and including pre-installed sensor fusion software and algorithms in a single package	<ul style="list-style-type: none">• Low power MCU (ARC EM4 at 20/50 MHz)• Integrated sensor fusion software• Open programmable platform with Software Development Kit
BHI160B	3.0x3.0 x0.95 mm ³	Low-power smart sensor system with an integrated 6-axis IMU (accelerometer, gyroscope) plus a MCU and including pre-installed sensor fusion software and algorithms in a single package	<ul style="list-style-type: none">• Low power MCU (ARC EM4 at 10 MHz)• Integrated sensor fusion software
BHA260AB	2.7x2.6x 0.8 mm ³	Programmable low-power smart sensor system with an integrated 3-axis accelerometer plus a MCU and including pre-installed sensor fusion software and algorithms in a single package	<ul style="list-style-type: none">• Low power MCU (ARC EM4 at 20/50 MHz)• Integrated sensor fusion software• Open programmable platform with Software Development Kit

AI sensor system

BHI260AP is a smart sensor that includes wide variety of software functionalities, a 32-bit customer programmable microcontroller, and a 6-axis IMU all in one package.

Product	Package	Description	Key performance parameters
BHI260AP	4.1x3.6x0.8 mm ³	Smart sensor system that includes multiple software functionalities, a 32-bit customer programmable microcontroller and a 6-axis IMU, all in one package.	<ul style="list-style-type: none">• Self-learning AI function• Programmability

Note: The **specs in bold** highlight improved feature(s) of the specific product compared to other products within the same product family.

Product	Integrated MCU	Embedded software*	Interfaces	Current consumption
BHI260AB	32 bit floating-point ARC EM4 CPU running at 20 MHz OR 50 MHz (up to 3.6 CoreMark/MHz) with 256 kByte SRAM, 144 kByte ROM	BSX 4.0 fusion (up to 800 Hz): activity & recognition, step detector & counter; custom programmable	Host interface configurable as SPI or I ² C, 3 master interfaces (selectable out of 2× SPI master and 2 × I ² C master), up to 25 GPIOs	6DoF Fusion at 800 Hz ODR: 1.2 mA 6DoF Fusion at 100 Hz ODR: 1.0 mA Step counter: 46 µA Activity recognition: 77 µA Standby current: 8 µA
BHI160B	32 bit floating-point ARC EM4 CPU running at 10 MHz (3.41 Core-Marks/MHz) with 48 kByte SRAM, 96 kByte ROM	BSX 3.0 fusion (up to 200 Hz): activity & gesture recognition, step detector & counter	I ² C up to 3.4 MBit/s 3 × GPIO, 1 × Host-INT	6DoF Fusion at 100 Hz ODR: 1.2 mA Significant motion: 128 µA Step detector: 131 µA Suspend mode: 11 µA

Product	Integrated MCU	Embedded software*	Interfaces	Current consumption
BHI260AP	32 bit floating-point ARC EM4 CPU running at 20 MHz OR 50 MHz (up to 3.6 CoreMark/MHz) with 256 kByte SRAM, 144 kByte ROM	Self-learning AI software for fitness tracking, swim analytics, pedestrian dead reckoning, relative & absolute orientation	Host interface configurable as SPI or I ² C, 2 master interfaces (1 selectable SPI/I ² C and 1 I ² C), Up to 12 GPIOs	Self-learning AI function (25Hz): 249 µA Self-learning AI function (50Hz): 386 µA Standby current: 8 µA

Note: The **specs in bold** highlight improved feature(s) of the specific product compared to other products within the same product family.

*More information on BSX fusion can be found on page 19.

Barometric pressure sensors

Bosch Sensortec's barometric pressure sensors enable a variety of smartphones, wearables and smart home applications. Our very small and low-power barometric pressure sensors stabilize the altitude of drones, enable accurate indoor navigation and improve precise calorie and distance counting in wearables. The pressure sensors work with the piezo resistive principle.

For all BMPs, the operation range is between 300 and 1250 hPa, VDDIO is 1.2...3.6 V and VDD is 1.65...3.6 V. The interfaces are I²C and SPI.

Product	Package	Description	Key performance parameters	Supply current	Accuracy	TCO
BMP390	LGA 2.0x2.0x0.8 mm ³	Ultra-high performance barometric pressure sensor	<ul style="list-style-type: none">• Outstanding temperature stability• Low noise and drift• High absolute and relative accuracy	3.2 µA at 1 Hz pressure and temperature	Relative accuracy of typ. ± 3 Pa at 700 ... 1100 hPa, 25 ... 40 °C Absolute accuracy of typ. ± 50 Pa at 300 ... 1100 hPa, -0 ... +65 °C)	Mean value ± 0.6 Pa/K (25 ... 40 °C at 900 hPa)
BMP384	LGA 2.0x2.0x1.0 mm ³	Robust & high performance barometric pressure sensor	<ul style="list-style-type: none">• Resistant against liquids, particles, dust etc.• Highest resolution mode at lowest bandwidth 0.016 Pa• Embedded temperature compensation• Embedded FIFO and interrupt	3.4 µA at 1 Hz pressure and temperature	(Relative accuracy of typ. ± 9 Pa at 700 ... 1100 hPa, 25 ... 40 °C Absolute accuracy of typ. ± 50 Pa at 300 ... 1100 hPa, -0 ... +65 °C)	typ. ± 1.0 Pa/K (25 ... 40 °C at 900 hPa)

Note: The **specs in bold** highlight improved feature(s) of the specific product compared to other products within the same product family.

Humidity sensor

The BME280 is a humidity sensor measuring relative humidity, barometric pressure and ambient temperature in one metal-lid package. The BME280 is developed specifically for mobile applications and wearables where size and low power consumption are key design parameters. For BME280, VDDIO is 1.2...3.6 V and VDD is 1.71...3.6 V. The interfaces are I²C and SPI.

Product	Package	Description	Key performance parameters	Supply current	Accuracy	Measurement range
BME280	LGA 2.5x2.5x0.93 mm ³	Combined absolute pressure (p), ambient humidity (h) and temperature (T) sensor	<ul style="list-style-type: none">• Fast response time for humidity (tau63 = 1 s)• High accuracy for T, p and rH over wide temperature and pressure range• High long-term stability	0.1 µA in sleep mode 1.8 µA at 1 Hz (h, T) 2.8 µA at 1 Hz (p, T) 3.6 µA at 1 Hz (h, p, T)	±3 % relative humidity ±1.0 absolute accuracy pressure (300...1100 hPa, 0...65 °C) ±0.5 at 25 °C for T	T: -40...85 °C p: 300...1100 hPa h: 0...100%

Note: The **specs in bold** highlight improved feature(s) of the specific product compared to other products within the same product family.

Gas sensors

The BME680 and BME688 are 4-in-1 environmental sensors combining barometric pressure, ambient temperature, relative humidity and gas measurement in one small package. They detect a broad range of gases including Volatile Organic Compounds (VOC) for air quality monitoring in smart homes to improve health and well-being.

The BME688 is the first gas sensor with Artificial Intelligence (AI). Additionally to all functions of the BME680, the BME688 can furthermore specifically detect Volatile Sulfur Compounds (VSCs) and other gases such as carbon monoxide and hydrogen in the part per billion (ppb) range. The BME688 comes with an application-specific gas scanner and BME AI-Studio software (see page 21).

For both BME680 and BME688, VDDIO is 1.2...3.6 V and VDD is 1.71...3.6 V. The interfaces are I²C and SPI.

Product	Package	Description	Key performance parameters	Supply current	Accuracy	Measurement range
BME688	LGA 3.0x3.0x0.93 mm ³	Same as BME680 + Suitable for the detection of various additional gases (VSCs, carbon monoxide, hydrogen, etc.) + Differentiation between multiple gases + Artificial Intelligence	Same as BME680 + BME AI-Studio tool enables customers to train the BME688 gas scanner on their specific application, like in home appliances, IoT products or smart home + BME688 development kit allows for testing and developing use cases based on temperature, humidity, barometric pressure and gas sensing	Same as BME680 + 3.96 mA in standard gas scan mode (configurable in AI-Studio between 0.1 - 12 mA)	±15% ±15 IAQ s2s deviation ±3 % relative humidity ±0.6 hPa absolute accuracy pressure (300...1100 hPa, 0...65 °C) ±0.5 at 25 °C for T	0 ... 500 IAQ (equivalent to 0.2 ... 20 mg/m ³ TVOC levels) T: -40...85 °C p: 300...1100 hPa h: 0...100%
BME680	LGA 3.0x3.0x0.93 mm ³	Combined gas (VOCs), absolute pressure (p), ambient humidity (h) and temperature (T) sensor	<ul style="list-style-type: none"> 4-in-1: All environmental parameters in one device BME680/688 Software (BSEC) suite provides many air quality outputs with compensation and simplifies gas sensor integration in devices Application specific operation modes with current consumption down to 90 µA 	0.15 µA in sleep mode 3.7 µA at 1 Hz (h,p,T) 0.09-12 mA for h,p,T, gas depending on operation mode	±15% ±15 IAQ s2s deviation ±3 % relative humidity ±0.6 hPa absolute accuracy pressure (300...1100 hPa, 0...65 °C) ±0.5 at 25 °C for T	0 ... 500 IAQ (equivalent to 0.2 ... 20 mg/m ³ TVOC levels) T: -40...85 °C p: 300...1100 hPa h: 0...100%

Note: The **specs in bold** highlight improved feature(s) of the specific product compared to other products within the same product family.

BSX lite/BSX

Bosch Sensortec's sensor fusion software BSX is a complete 9-axis fusion solution which combines the measurements from 3-axis gyroscope, 3-axis geomagnetic sensor and a 3-axis accelerometer to provide a robust absolute orientation vector. BSX features support for wide variety of applications including smartphones, wrist wearables, drones, home robots such as vacuum cleaners, AR/VR head mounted devices and gaming controllers. These virtual sensors are highly flexible and hence can be configured according to system architecture and target use case.

The BSXlite software is a feature reduced version of Bosch Sensortec's sensor fusion software. BSXlite provides dynamic and accurate orientation of the target platform. It is typically used to provide enhanced user experience for gaming, navigation systems, dead reckoning etc. BSXlite is available for download (after accepting the license agreements), and for the BSX full version software, please contact Bosch Sensortec directly.

BME680/688 software (BSEC)

The BME680 library (BSEC 1.x) provides higher-level signal processing and fusion for the BME680. The library receives compensated sensor values from the sensor API. In order to fully provide the requested sensor outputs, BME680 software processes the BME680 signals and combines them with the additional phone sensors.

The BME688 library (BSEC 2.x) is running on the device microcontroller to operate the BME688, to analyze the sensor data and to calculate all sensor outputs like ambient humidity, index for air quality or gas scan results. The BME688 software can be configured by config strings generated by BME AI-Studio. Both BME680 and BME688 software offer a complete, easy to integrate software fusion solution out of one hand and thus eliminate the need for own fusion software development.

The BME AI-Studio software enables sensor configuration, data analysis & labelling, training and optimization of application-specific solutions. The software is designed very user-friendly and supports with a comprehensive documentation.

Product	Operating system	Key features	Operation modes	Software outputs	Link to website
BME680 library (BSEC 1.x)	Cortex-ARM, Cortex-A, AVR, ESP, MSP, Android, IAR, Raspberry Pi (+more on demand)	<ul style="list-style-type: none">• Calculation of ambient air temperature, relative humidity, barometric pressure and index for air quality outside the device	<ul style="list-style-type: none">• ULP mode (3.3 mHz)• quick-ULP (0.33 Hz / 3.3 mHz)• LP mode (0.33 Hz)• HP mode (1 Hz)	Raw & compensated outputs for temperature, pressure, humidity and gas, IAQ, CO ₂ -eq (ppm), bVOC-eq (ppm), gas (%), accuracy & stabilization status

BME AI-Studio	Windows, Mac	<ul style="list-style-type: none">• Sensor configuration, data analysis & labelling, training and optimization of application-specific solutions• Comprehensive documentation	Gas scan mode can be defined & optimized on specific application	BSEC 2.x config string to configure devices with trained AI model	

Development desktop software 2.0

The Bosch Sensortec application board 3.0 is a versatile, universal demonstration and development environment enabling the evaluation of the Bosch Sensortec sensor products. Used together with Bosch Sensortec's development desktop software, it allows to configure all sensor parameters and read-out, display and capture the data on the attached PC. The development desktop 2.0 user interface offers the possibility to configure sensor parameters of the Bosch Sensortec sensors and allows for data logging of the measured sensor signals. Its user interface displays the sensor signals and sensor interrupt signals in various graphical formats.

COINES

COINES ("Communication with INertial and Environmental Sensors") is a software package that provides a low-level interface to Bosch Sensortec's application board 3.0. The COINES library package contains the source code of sample applications and SensorAPI. The software can be used to see how to use the SensorAPI in an embedded environment and allows convenient data logging. COINES is intended for experienced embedded software developers with good knowledge of the programming language C and the appropriate build tools. The user can access Bosch Sensortec's MEMS sensors through a C interface and modify, compile and run the sample applications. COINES can be used with the SensorAPI of the sensor. The SensorAPI is available at <https://github.com/BoschSensortec>. Source code of sample applications and SensorAPI are provided with the COINES library as a package. The user can modify, compile and run the sample applications.

COINES can be used to see how to use the SensorAPI in an embedded environment and allows convenient data logging.

Application board 3.0

Our application board 3.0 is a versatile and sensor independent development platform, enabling a fast and easy experience with our sensors. The combination of the application board 3.0 and shuttle board 3.0 can be used to evaluate the sensors and build prototypes to test use cases. The application board is a closed system that can be used to configure sensor parameters and to plot and log the resulting sensor readings by means of PC based software (Desktop Development) and COINES.

Arduino Nicla Sense ME

The versatile Arduino Nicla Sense ME featuring Bosch Sensortec sensors is a robust development board that enables users to develop smart sensing applications. Embedded in the Arduino-ecosystem, the tool comes with a simple and clear programming structure that is easy-to-use for enthusiasts, yet flexible enough for advanced users. The unique combination of highly integrated sensors on the board, including 9DoF smart motion and 4DoF environmental sensors with AI capabilities, allow a broad range of applications to address the different segments of the IoT market. The tool is ultra-compact, power-saving and suitable for rapid prototyping and deployment.

Community to foster and accelerate innovative IoT applications

Bosch Sensortec offers an ideation community to customers, partners, developers and makers to learn about sensing solutions and to accelerate the development of innovative IoT applications. The Bosch Sensortec Community provides useful information, best practice advice and allows developers to share their experience with others.

MEMS sensors forum

The forum is intended for developers, customers, partners and makers using Bosch Sensortec's sensing solutions. Ask your questions, share your ideas, and exchange with experts.

Knowledge base

The knowledge base is intended for developers, customers, partners and makers using Bosch Sensortec's sensing solutions.
